SUMMARY

Aspiring Data Analyst & ML Enthusiast with experience in **Python, SQL, Machine Learning, and Data Visualization** through 2 internship, 3+ projects, and multiple certifications. Skilled in **EDA, statistical analysis, and AI model development** with a strong focus on solving real-world problems using data-driven approaches.

WORK EXPERIENCE

Celebal Excellence Intern (CEI) 2026 | Celebal Technology May 2026 - Present

- Completed industry-focused training in **Data Science, Machine Learning, and Analytics**.
- Applied **data preprocessing, visualization, and modeling techniques** on real-world datasets.
- Collaborated with mentors to develop end-to-end Data Science projects and solutions.

Data Analyst Intern | Samatrix Consulting Pvt. Ltd. June 2025 - July 2025

- Performed **EDA, data cleaning**, and preprocessing using **Python, Pandas, and Scikit-learn**
- Applied **statistical analysis** to identify trends and actionable insights
- Delivered structured reports supporting data-driven decision-making

PROJECT EXPERIENCE

SMS Spam Detection System 📧

- Built an SMS Spam Detection system using **NLP and machine learning**.
- Evaluated multiple classification models to improve prediction accuracy.
- Applied **text preprocessing and feature engineering techniques**.
- Developed an end-to-end spam classification pipeline in Python.

Recall | Minor Project 📷

- Built an AI-powered image search platform using **FastAPI, JavaScript, OCR, and Computer Vision**.
- Optimized image uploads, reducing file sizes by up to **90% through client-side compression**.
- Improved inference performance by **3-5×** and cut user wait times to **<2 seconds** with asynchronous processing.
- Developed a responsive UI with real-time gallery updates and mobile-first design.
- Tech Stack:** Python, FastAPI, JavaScript, HTML, CSS, OCR, Computer Vision, Docker, Git/GitHub.

KrishiAi| Crop Disease Detection System | Code For Bharat 🌾

- Built a **full-stack agriculture management** platform using React.js and Flask.
- Implemented soil health analysis and crop recommendation features.
- Integrated weather monitoring and **forecasting APIs** for farm planning.
- Developed crop disease detection with treatment recommendations.
- Created a multilingual farmer community portal for knowledge sharing.

EDUCATION

B.Tech - CSE (AI & ML) 2023-2027

JECRC University, Jaipur CGPA: 8.2/10

Senior Secondary Education 2021-2022

The Castle Convent School, Jaipur Percentage 79%

TECHNICAL SKILLS

- Languages:** Python, Java(DSA),C++, R, HTML, CSS, JavaScript, SQL
- Frameworks & Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, Keras, OpenCV, NLTK, Matplotlib, Seaborn, Flask, FastAPI
- Tools & Platforms:** Git, GitHub, Jupyter Lab, Google Colab, VS Code, PyCharm, IntelliJ IDEA

CERTIFICATES

- [Data Analysis Using Python](#)
- [Probability Modelling Using Python Machine](#)
- [Learning & Pattern Recognition](#)
